

Guru Nanak Dev Engineering College, Ludhiana

Meeting Report

IPR Cell of the college organized a meeting for strengthening and enhancing its working on 8th October 2020. Members of IPR cell and Nodal officers (Academics, Procurement, Finance) attended the meeting. Its motive was to initiate the process of patenting and other IPR activities by actualizing the work of the cell. Dr. Inderpreet Kaur (Professor, Desh Bhagat University and alumni of GNDEC) was being invited as one of the experts for discussing the scope of services and facilities which can be provided by available IP firms to our college for pursuing projects and ideas for patent filing. As she has wide experience in the field of patenting and is associated with such activities from a very long time, her expertise helped the cell to decide on the further plans to be implemented. This meeting proved very beneficial for the cell and the college as a whole by reaching to the conclusion of hiring some IP Agency to assist the college in IP activities.
