

Summary Report

Department of ECE has organized 12 days Pre-Orientation Program with NSIC, Rajpura under TEQIP-III for final year students of ECE branch of Batch 2017-21 of Section-A, so that students get well familiar with the latest trends in the field of Electronics & Communication Engineering. To provide expert lectures for students, resource persons for this program were hired from NSIC, Rajpura. Er.Rigzin Angmo, Dr.Ranjit Singh & Dr.Mehar Singh Sidhu shared their knowledge with students on Machine Learning using Python Programming Language, Digital Image Processing using MATLAB & LabView Programming Concepts respectively during Pre-Training Orientation program.

Why this program? This program is the part of curriculum for the final year students so that students must be made aware about industry trends before joining 6 months industrial training.

Program Modules:

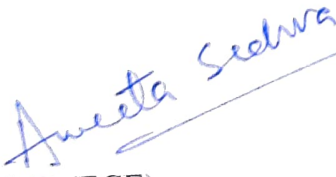

Module 1: Machine Learning using Python Programming Language- 5 Days

Module 2: Digital Image Processing using MATLAB- 4 Days

Module 3: LabView Programming Concepts- 3 Days

The program was held online from 10:00AM to 01:00PM daily for ECE students. Students had shown their keen interest during this training program.
