

ACTIVITY REPORT

Name of Event: ITCSD 2020

Date: 19-21 February 2020

Venue: NITTTR , Sector 26, Chandigarh

About the Conference: The conference was about innovative technologies for clean and sustainable development. It was a well organised event held at different venues in the premise of NITTTR. It had separate venues for poster presentation and paper presentation which was held simultaneously. The topic of my paper presentation was "**A study on removal of cutting oil from wastewater by using agricultural wastes**" in the Golden Jubilee room in a session chaired by Dr Ponnada. The Chairperson found my topic interesting and appreciated it. It was a good experience to chair the 4th session on day 1 and co chair the session 10c on day 2. I enjoyed both the scientific part and the social program.

Expected Benefits Derived:

This conference provided me with an opportunity to extend my existing networks which proves to be very helpful as best of experts not only from reputed institutes and of excellent calibre from India but from abroad too participated in this conference I am sure that it shall not only add to my scientific experience but to my personality too.

Dr Amanpreet Kaur Sodhi
Assistant Professor
Department of Applied Science
Guru Nanak Dev Engineering College, Ludhiana
